

## FOUNDATION STAGE WORKSHOP FEEDBACK

Useful to see what objects the children are using in class to learn. This gives us an idea of how to teach them at home.

Very informative and very interesting to see what kind of apparatus is used in the classroom. It is also helped me think of more ideas of what else we can do at home, thank you.

Fantastic workshop. Great to hear specifics of what they are learning and set ideas of games to play at home to reinforce learning.

Really useful, lots of different things to do at home. It was lovely seeing the children in their classrooms.

Very informative, love the Bee Bots

Today was great! Lovely to see how my daughter learns her maths, and to see what they use in their learning. Very informative and it's given me lots of ideas for our home learning too. Thank you.

Really interesting. I will tell another parent who was not able to attend, word for word as I have written it all down. I have some ideas now for things that he can do at my house in the holidays.

I really enjoyed the maths workshop. It's lovely to know that the children are taught in a fun way, using toys and play will encourage extended learning.

Many thanks for the workshop. My child has been counting more lately and enjoys telling us the time, all the time.

Very helpful, lots of ideas given that we can use at home.

It's lovely to see pictures of the children learning and to see and feel that they experience. Thank you for these sessions.

Good use of stimulus.

Thank you, today was very useful and gave me lots of helpful ideas for different ways to learn at home. It was lovely to see class registration too.

So lovely to see the children in the classroom during registration and where they sit etc.

Very useful workshop, I enjoyed learning about the ways the children learn maths through play and look forward to using those concepts at home.
