WORKSHOP FEEDBACK

Great information, nice to have all the toys to try as well. Nice to also see the pictures of the different things they do at school.

Very informative and useful. Interesting to hear about how simple activities are helping their development and skills. We will certainly be doing more of this at home from now on.

Really helpful session again, it's really helping to give an insight into how the children see the world! My daughter has told me about her P.E lessons. I now understand what she was trying to explain to me. Thanks again.

Excellent workshop! Made me think about the tools needed to improve development. Even the simple things e.g. stepping on logs and balance, things to do at home too.

Good to know what all the exercises teach the children and how it helps their motor skills. Very informative.

It's really great seeing how the children are learning and we can take it home with us to continue it there as well. Thank you so much, you all do so well.

Very informative, more to Physical Education than just running around and being active. Thank you.

Lots of information and ideas for learning at home. And, finding out about BEAM. Thank you.
