Reception

This week, we visited the respectful receptions. First, they have been learning all about what is in the garden and making insects out of junk modelling for their topic.

Maths

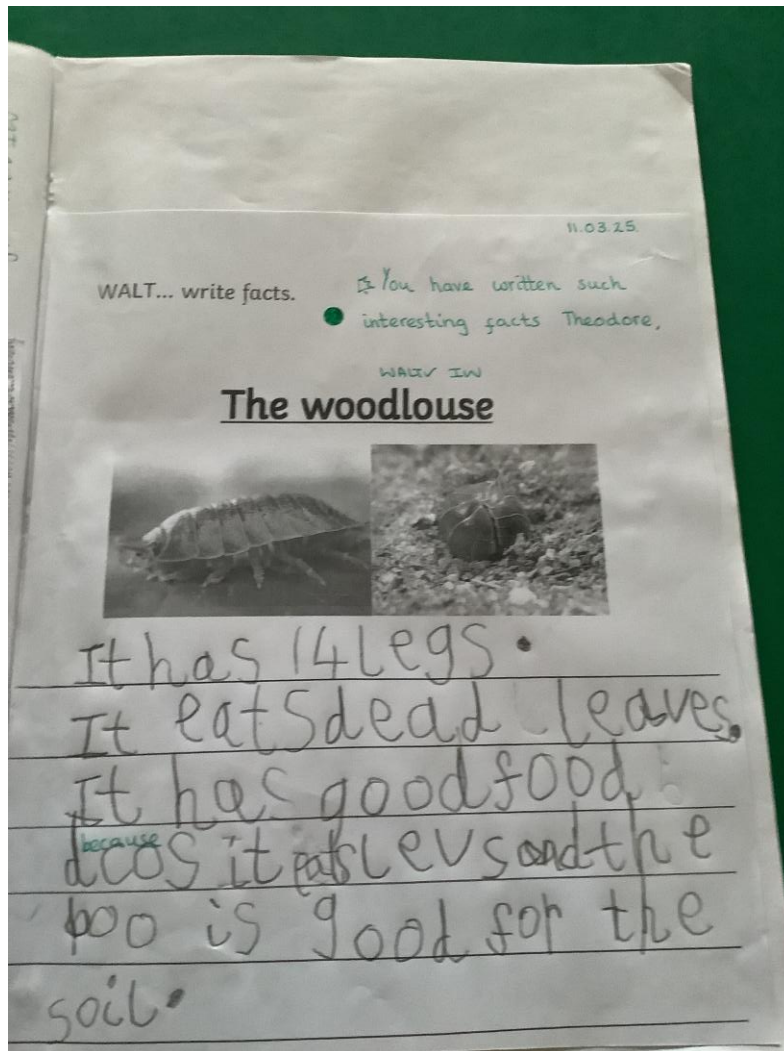

Then, in maths, they have been challenging themselves by subitizing and counting numbers.

Science

Next, in science, they have been looking at how to dye a flower in colourful water.

English

Finally, in English, they have been writing interesting facts about woodlice.

Remember...

Together everyone
achieves more!
